

RoHS Directive and Product Compliance

Since July 2006, non-RoHS-compliant WEEE products are no longer allowed to be placed into the European markets. In January 2013, the RoHS2 Directive 2011/65 came into force. The RoHS2 amendment Directive 2015/863 added 4 Phthalates to the original 6 RoHS substances. It has become effective for all WEEE products placed on the market from July 22, 2019 and all our products placed on the market after this date follow these requirements. However, a limited number of products already placed on the market before this date continue to be sold.

Since January 2013, RoHS products are labelled with the CE logo. Our CE Declaration of Conformity for every individual product also declares RoHS-compliance. Starting from January 2021 Lindy Electronics Limited will also provide the respective UKCA Declaration of Conformity for the British market.

If there is a legitimate requirement, we will provide you with the CE or UKCA Declaration of Conformity for each individual article on request. Please contact your local Lindy sales and support team in this case.

Please note that we do not provide any additional general RoHS declaration.

Lindy-Elektronik GmbH (Manufacturer EU)
Lindy Electronics Limited (Manufacturer UK)
