5Gbps  
100W PD†**

**PD 3.0**

**Pass Through  
UP TO 100W**

**BC 1.2**

- **EXTENDED DISPLAYS.** Unlike other docking stations, the DST-Mx Duo can support two external displays at 4K resolution with your MacBook. This is thanks to the Mx Duo's support for MST (Multi Stream Transport) for Mac. There are two HDMI ports, one with 60Hz capability and the other with 30Hz. Simply plug in your HDMI displays and the docking station will provide Ultra HD resolution through a single USB-C connection.

- **PASS-THROUGH CHARGING.** Thanks to the integrated PD 3.0 port, you can plug your device's charger into the Mx Duo and experience up to 100W pass-through charging (depending on the charger's capabilities). This allows you to charge your device whilst working without having to use up any more ports, meaning there is more connectivity potential for other peripherals and accessories.

- **MAC COMPATIBILITY.** A software-based solution is required for MST for Mac to enable the dual extended display feature. Download the driver straight from the product page, connect the docking station, to your device and you are good to go.

- **ADDED CONNECTIVITY.** Providing all the ports you need for a productive workflow; the Mx Duo uses a single USB 3.2 Type C cable to connect up to two 4K HDMI displays whilst providing Gigabit Ethernet connection. Two SuperSpeed 5Gbps USB Type A ports also support BC 1.2 for fast charging your mobile devices. For audio support, a 3.5mm combo headphone & microphone port is provided.

Extend screen real estate with dual 4K displays.
