

LINDY x VIEWSONIC

PERFECTLY CONNECTED FOR EXCEPTIONAL EXPERIENCES

POWERING INTUITIVE DISPLAYS WITH RELIABLE CONNECTIONS

Lindy's high-quality connectivity solutions—such as cables, docking stations, extenders, splitters, and converters—ensure that ViewSonic's interactive displays perform at their best in any environment. Whether you're setting up in a classroom, meeting room, or large venue, Lindy products deliver reliable signal transmission, minimal latency, and broad compatibility. This means you can enjoy seamless touch interactivity, crystal-clear visuals, and smooth collaboration without technical disruptions.

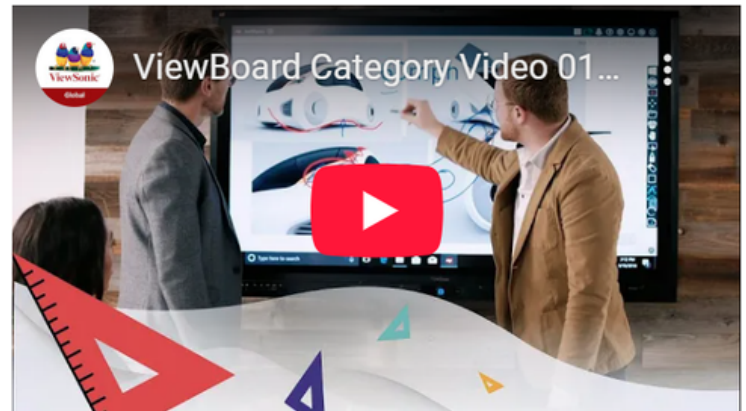

THE CHALLENGE

The Lindy and ViewSonic partnership tackles the widespread issues that often undermine interactive display installations. Many organisations struggle with unreliable signal transmission, especially over longer distances, resulting in flickering screens, delayed touch response, or even complete signal loss during critical meetings. Device compatibility is another challenge—teams frequently need to connect laptops, tablets, and peripherals from different brands and operating systems, leading to frustrating connection failures and wasted time troubleshooting. Additionally, messy, complicated cabling setups not only create clutter but also increase the risk of accidental disconnections and technical errors.

THE SOLUTION

ViewSonic's advanced interactive displays, combined with Lindy's reliable connectivity solutions, create an end-to-end setup that empowers effective communication and collaboration. ViewSonic delivers vivid, responsive touchscreens ideal for presenting, teaching, or brainstorming, while Lindy provides the essential infrastructure—docking stations, cables, extenders, and splitters—to connect multiple devices quickly and reliably. It's a dependable, all-in-one solution that transforms any space into a connected, engaging hub for learning, presenting, and collaborating.

PRODUCTS DESIGNED TO INTEGRATE

FOR EDUCATION

Classroom Essentials

- EDLA - certified IFP34 Series
- Smart software aids learning, dual USB-C speeds up data and charging, and EPEAT Gold cuts energy by 20%.

Brilliance at a Touch

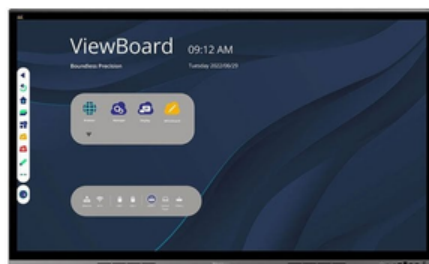

- EDLA - certified IFP53 Series
- Colour stylus for instant notes, fast NFC/SSO logins, and four USB-C ports with 100W charging.

One Touch Ahead

- EDLA - certified IFP51 Series
- Write away delivers instant annotation, quick personalised sign-in, and flexible displays for any classroom.

FOR WORKSPACE

Meeting Perfection

- IFP62 Series
- All-in-one 4K touch display with USB-C, wireless casting, and myViewBoard management.

Seamless Collaboration

- IFPUW Series
- 5K ultrawide touch display with Teams, dual USB-C, 8 mics, 60W speakers, and wireless casting.

TOP LINDY PICKS FOR VIEWSONIC SCREENS

DST-PRO Universal Laptop Docking Station - No. 43366

Supports triple 4K displays, 100W USB-C charging, fast USB 3.2 ports, works with USB-C or USB-A laptops.

15m USB 3.2 & DP 1.4 Type C Fibre Optic Hybrid Cable - No. 43399

Supports 10Gbps data, 4K DisplayPort™ 1.4 video, 60W power delivery, and EMI-resistant over long-distances.

10m USB Type C to HDMI® Adapter Cable with HDR - No. 43317

Delivers reliable 4K60, HDR video from a USB-C port over 10m with an active chipset.

5m USB 3.2 10Gbps C/C Active Cable - No. 43308

Delivers 10Gbps data transfer, 8K DisplayPort™ 1.4 video with 100W power delivery.

2m High Speed HDMI® Cable, Black Line - No. 36472

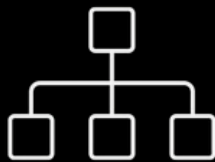

Supports 18Gbps HDMI® 2.0 for 4K60 video, features triple shielding with gold-flashed contacts.

RESULTS & BENEFITS

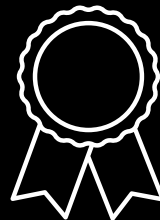

The partnership between ViewSonic and Lindy delivers a fully integrated, plug-and-play display solution that ensures seamless interactivity, stable connectivity, and broad device compatibility across diverse environments. As a result, users benefit from hassle-free collaboration, quicker setup times, and dependable performance—empowering more engaging, efficient, and productive experiences in classrooms, meeting rooms, and hybrid workspaces.
