

THE VERDICT IS IN: LINDY DELIVERS RELIABILITY.

POWERING RELIABLE COMMUNICATION AT THE HEART OF THE VENICE COURT

As part of a Ministry of Justice project Lindy's long-standing partner N&C SRL designed and installed a multimedia conference room and multipurpose hall at the Venice Court, Italy.

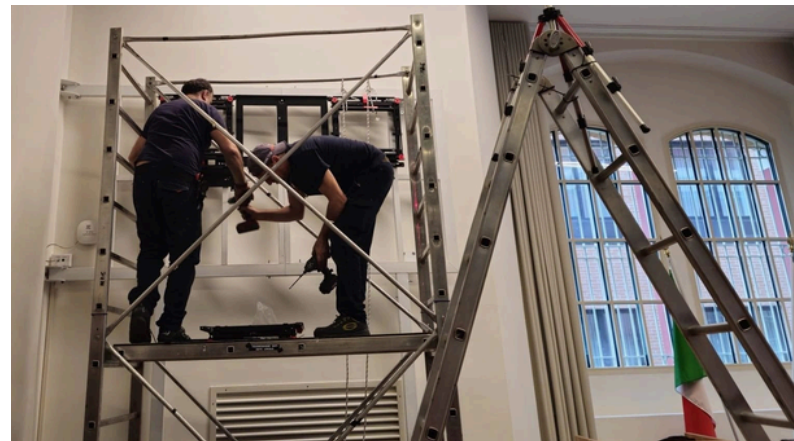

The project's main objective was to create a technologically advanced, reliable, and user-friendly environment capable of supporting a wide variety of

functions — from judicial hearings to professional conferences.

It is worth noting that the customer had previously relied on other suppliers' solutions, which were later replaced with Lindy products to achieve greater reliability, signal stability, and integration performance.

THE CHALLENGE

The installation required a comprehensive and fully integrated AV infrastructure that could deliver uninterrupted signal stability and high-quality transmission across multiple devices and displays. Given the system's complexity and the strict performance standards of the Ministry of Justice, achieving both operational reliability and ease of control was a key priority.

LINDY'S SOLUTION

To meet these requirements, N&C SRL implemented a fully integrated audio-visual system built around Lindy connectivity solutions, ensuring reliable performance throughout the installation. The system included centralised control for intuitive management, Lindy extenders and HDMI®/USB cabling for stable long-distance signal transmission, high-resolution video walls, and a flexible wired and wireless conferencing setup.

Wireless microphones and uniform sound distribution completed the solution, delivering clear audio coverage and a scalable, professional system tailored to a judicial environment.

PRODUCTS USED

70m Cat.6 HDMI® 4K30, IR & RS-232 HDBaseT™ Extender

70m Cat.6 4 Port HDMI® 4K30 & IR Splitter Extender

1m, 2m and 3 m High Speed HDMI® Cable, Cromo

3m USB 3.2 Type A to C Cable, 10Gbps, Anthra Line

Extends HDMI® up to 70 m over Cat 6 with 4K30 Hz, IR/RS-232 control, and PoC using reliable HDBaseT™ technology.

Distributes 4K HDMI® to 4 displays up to 70 m over Cat 6 with IR control, loop-out, and PoC for easy installation.

Premium HDMI® 2.0 cables delivering ultra-clear 4K60 Hz video, high-fidelity audio, and durable chrome design build quality.

3 m USB-A to C cable offering 10 Gbps transfer, 100 W charging, and durable triple-shielded, gold-plated connectors.

“Lindy solutions ensured outstanding reliability, signal stability throughout the Venice Court installation. Their technology helped us meet the Ministry of Justice’s high standards with confidence and precision.”

Mr. Fabio Tumminia, AVC Technical Manager at N&C

RESULTS & BENEFITS

The completed system delivers outstanding reliability and signal integrity, even in a complex AV environment. Lindy’s high-quality extenders and cables ensured stable transmission, eliminating interruptions and maintaining professional-grade performance throughout the project.

Both N&C SRL and the Ministry of Justice expressed high satisfaction with the results, highlighting Lindy’s superior build quality, innovative technology, and ease of integration. The project demonstrates how Lindy connectivity solutions can seamlessly support mission-critical environments while simplifying day-to-day operations.
